

DIGITAL NOTICE BOARDS

WALL & STAND MOUNTED

The latest technology in digital & changeable information displays

- Acts as a fully operating PC - 'Windows XP or VISTA' operating systems available
- Full 'Powerpoint' functionality including full colour photographs, videos, text and animations, or install your own 'Windows' compatible software
- Variable slide speeds
- Easily create your displays on your PC or directly on the Digital noticeboard (USB keyboard & mouse required) and 'Powerpoint 2007' (available to purchase pre-installed - see below)
- Choose either a default display to load automatically on start up, or auto-play and quick-change your displays via USB memory stick
- WiFi (wireless) or Cat 5 network versions available (requires 'Windows' based server)

Portrait or Landscape mode (requires 'Powerpoint 2007')

Please note that all stand poles are matched to the colour of the screen surround (see swatch), except for a solid colour surround, which comes with a satin silver pole as standard. All stand bases are in scratch-resistant antique pewter as standard - see page 35
